DETAILED ACTION

Allowable Subject Matter

1. Claims 1-2, 4-12, and 14-23 are allowed.
2. The following is an examiner's statement of reasons for allowance:

The terminal disclaimer filed 8/9/06 by the applicant has overcome the provisional double patenting rejection in the Office Action mailed on 6/5/06.

With respect to independent claims 1, 11, 21, and 22, the specific technique of combining the digital signal with the complex image correction factor by "multiplying said in-phase component by a value of a first function of the real portion of said complex image correction factor to form a first product; multiplying said in-phase component by a value of a first function of the imaginary portion of said complex image correction factor to form a second product; multiplying said quadrature component by a value of a second function of the real portion of said complex image correction factor to form a third product; multiplying said quadrature component by a value of a second function of the imaginary portion of said complex image correction factor to form a fourth product; accumulating said first and fourth products; and accumulating said second and third products" was neither found nor fairly suggested in the prior art.

Claims 2 and 4-10 are allowed as being dependent on independent claim 1.

Claims 12 and 14-20 are allowed as being dependent on independent claim 11.

Claim 23 is allowed as being dependent on independent claim 22.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
